Rosink

Mounting Appliance RMA

Application

The Rosink metallic wire mounting appliance has been developed for accurate mounting of metallic wires for cylinder, doffer, lickerin rollers and smaller rollers. Due to its unique design it can also be used for all roller cards.

Advantages

- > One device for all cards.
- > Quick and safe mounting for all wire types.
- > Easy assembly.
- > Constant winding tension.
- > Permanent display of the actual winding tension.
- > Prevents vibrations during winding.
