

Can Coilers

Neuenhauser Maschinenbau GmbH
Hans-Voshaar-Strasse 5
49828 Neuenhaus

We offer a wide variety of conventional and specialized can coilers. These Rosink machines serve the textile industry in carding and spinning, but also are used in many other special applications not directly related to conventional spinning. In 70 years Rosink supplied more than 30.000 machines all over the world.

Rosink

Non-woven Hygiene Machines

In niche markets, like personal care and (feminine) hygiene industry, Rosink offers bleached cotton sliver production machines and flat ribbon production machines. The sliver and flat ribbon is created inside the card by specially designed Rosink material forming units. Cotton swabs, cotton balls, pads and tampons can be manufactured very efficiently with short production process.
